

# 0055 Project Management Course in English

Project Management is one of the most powerful key drivers in companies. Do you want to develop your capabilities, contribute and convince with successful projects? With this course, you gain profound expertise in Project Management fundamentals and soft skills and learn to communicate strong and confidently. Exciting insights into the method toolbox will expand your scope of action and strike you on new ideas for challenging projects.

Benefit from certified experts' best practices and their secret of success: You learn stepwise,

- how to define the scope and deliverables
- maintain and communicate an up-to-date schedule to deliver projects on time
- plan an accurate project budget
- develop and manage project teams

to ensure the successful completion of projects with the right deliverables in time and within cost.

This course provides selected project management approaches, with a focus on current, frequently used guidelines.

Based on numerous examples, you will learn, experience and gain the most important competences for excellent project managers, which you then can transfer from theory into practice.

After completion of this course, participants may be able to obtain a diploma.

## **Trainer**

Stefanie Lintschinger

## **Proof of Competence**

Diploma after successfully passed examination consisting of preparation and presentation of a project thesis.

(Nach Ausarbeitung einer Projektarbeit kann eine Prüfung abgelegt werden. Die Prüfung besteht aus der Präsentation der Projektarbeit. Und wird von der Lehrgangsführerin beurteilt.)
